

Introduction to Data Management Practices

Apply DM practices to your own work

NBIS DM Team

data-management@scilifelab.se

Learning outcomes

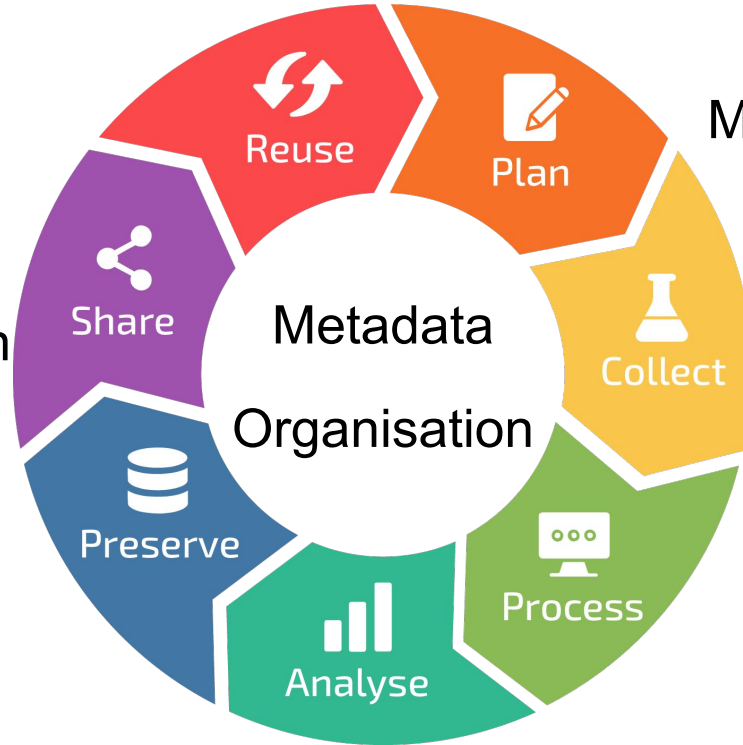

Take the first steps towards a more systematic and reproducible approach to managing research data

Feel comfortable enough to start applying some practices and continue learning more

Cleaning data

Version control

Name one data management practice that you will apply to your own project and get started in the next 1.5 hours

Some suggestions

- Make a DMP
- Create a README file
- Create a Github repository for my project
- Organize your data
- Clean your data with OpenRefine
- Create a dictionary for one of my datasets

Wrap-up

Demonstrate output of what you have done
