PYTHON

- Graphical text editor more similar to what you might be used to
- Launch through command line:

```
$ gedit
```

A screenshot of the Gedit text editor interface. The window title is "test.py" located at "~/work/tmp". The menu bar includes "File", "Edit", "View", "Search", "Tools", "Help", and "About". The toolbar contains icons for "Open", "Save", "Print", and "Close". The main text area displays the following Python code:

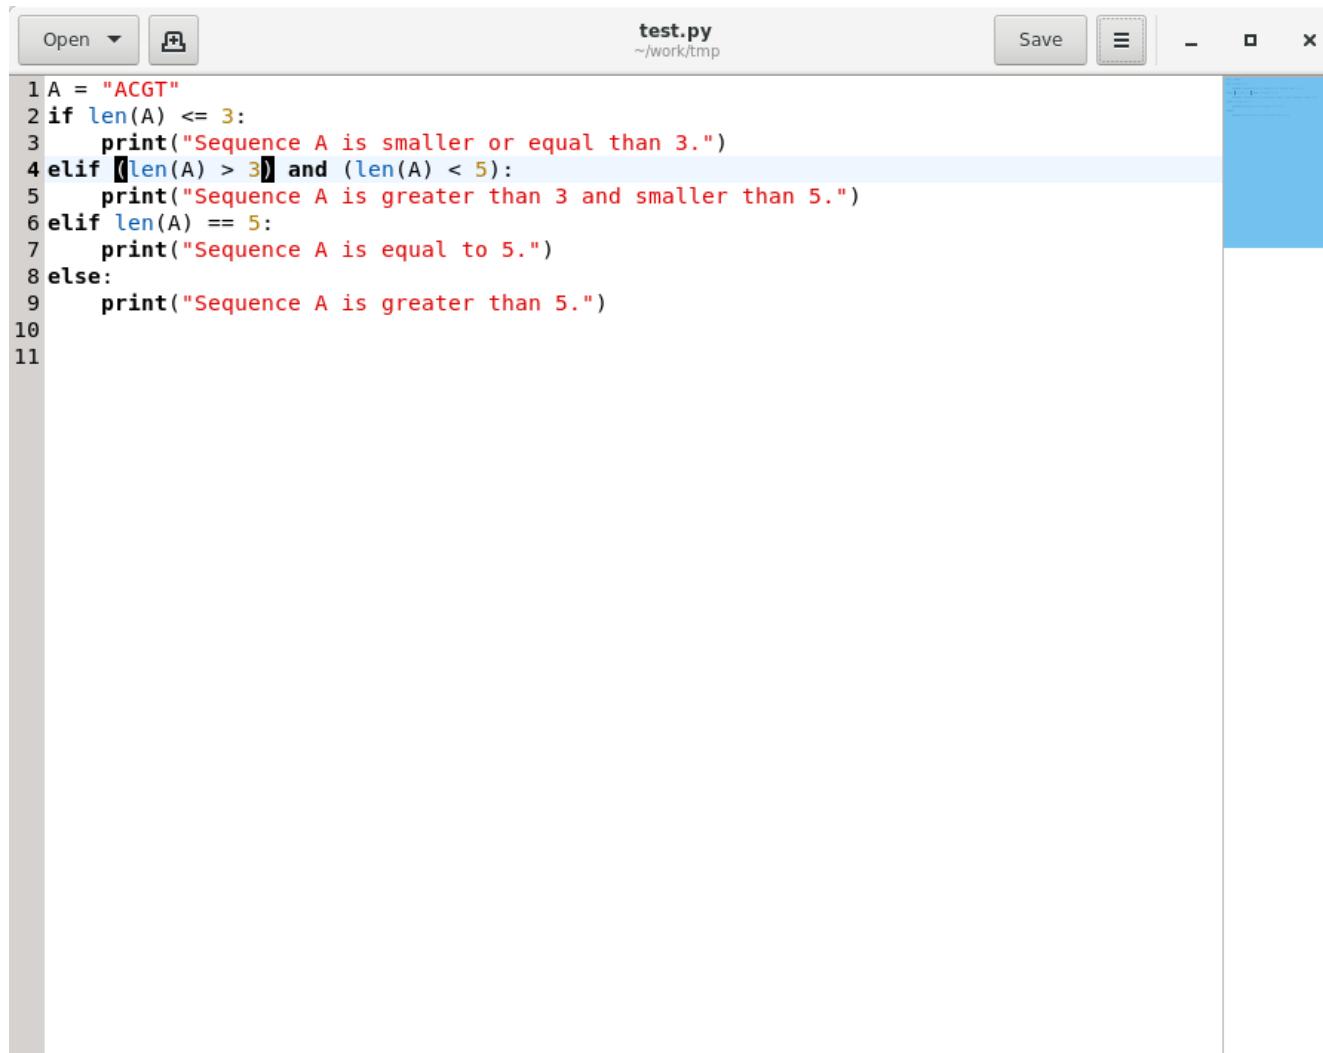

```
A = "ACGT"
if len(A) <= 3:
    print("Sequence A is smaller or equal than 3.")
elif (len(A) > 3) and (len(A) < 5):
    print("Sequence A is greater than 3 and smaller than 5.")
elif len(A) == 5:
    print("Sequence A is equal to 5.")
else:
    print("Sequence A is greater than 5.)
```

The status bar at the bottom shows "Python" as the language, "Tab Width: 4", "Ln 4, Col 7", and "INS" indicating insert mode.

A screenshot of the Gedit text editor interface. The title bar shows "test.py" and the file path "~/work/tmp". The main window displays the following Python code:

```
1 A = "ACGT"
2 if len(A) <= 3:
3     print("Sequence A is smaller or equal than 3.")
4 elif [len(A) > 3] and (len(A) < 5):
5     print("Sequence A is greater than 3 and smaller than 5.")
6 elif len(A) == 5:
7     print("Sequence A is equal to 5.")
8 else:
9     print("Sequence A is greater than 5.")
10
11
```

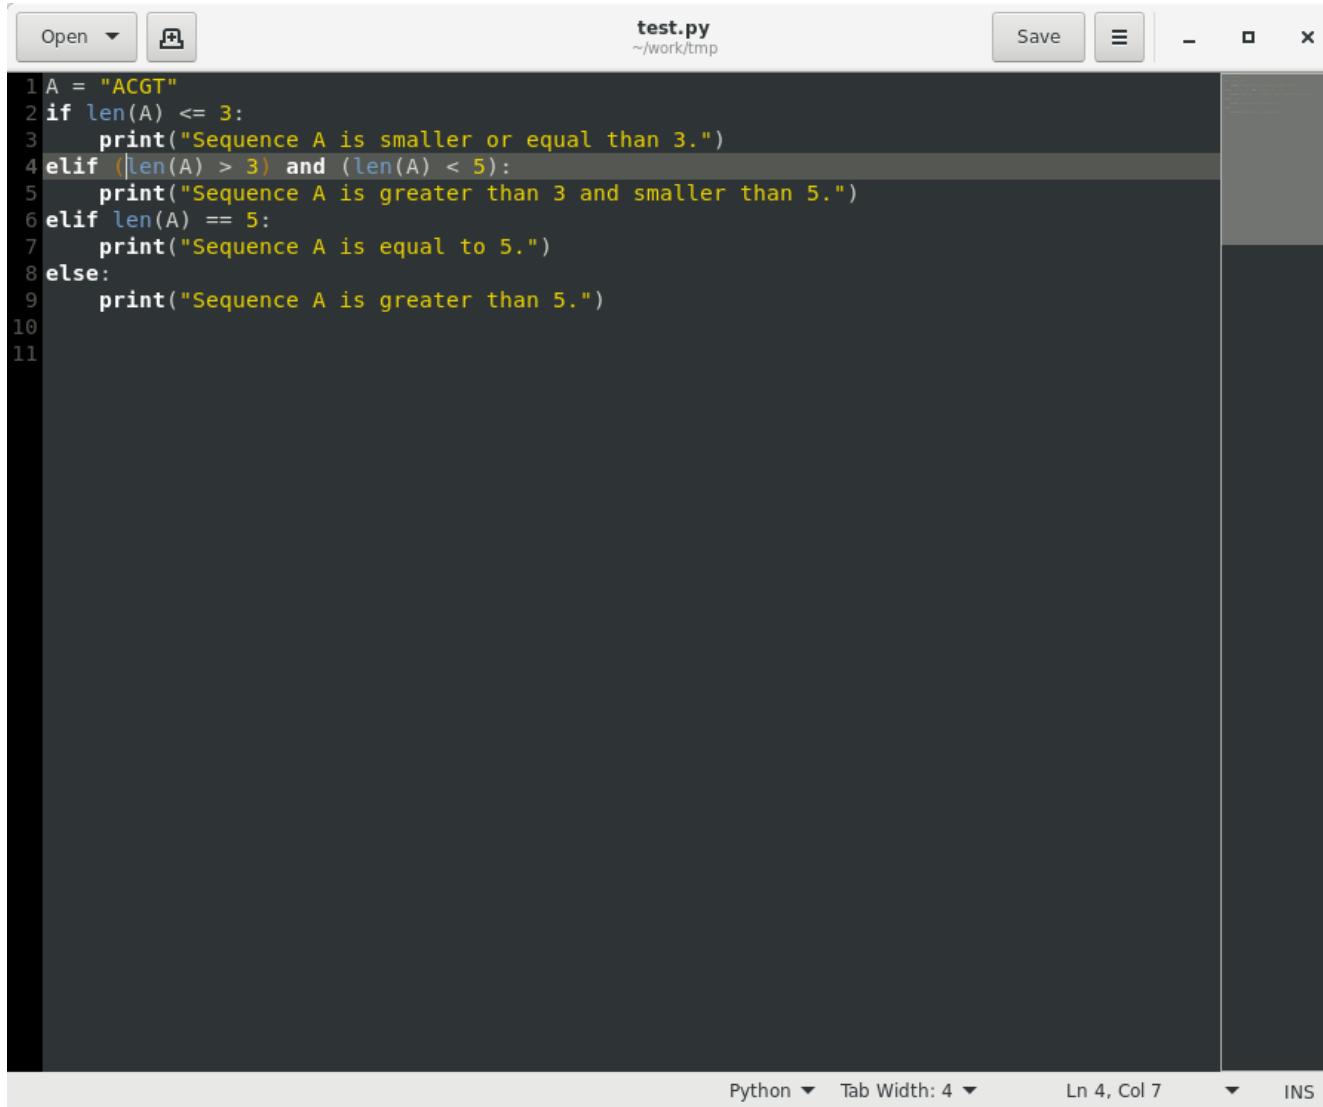

The code uses syntax highlighting where keywords like "if", "elif", and "else" are in red, and strings are in blue. The editor's status bar at the bottom shows "Python" as the language, "Tab Width: 4", "Ln 4, Col 7", and "INS" indicating insert mode.

A screenshot of the Gedit text editor interface. The title bar shows "test.py" and the file path "~/work/tmp". The menu bar includes "File", "Edit", "View", "Search", "Tools", and "Help". The toolbar has "Open", "Save", and other icons. The main code area contains the following Python script:

```
1 A = "ACGT"
2 if len(A) <= 3:
3     print("Sequence A is smaller or equal than 3.")
4 elif [len(A) > 3] and (len(A) < 5):
5     print("Sequence A is greater than 3 and smaller than 5.")
6 elif len(A) == 5:
7     print("Sequence A is equal to 5.")
8 else:
9     print("Sequence A is greater than 5.")
10
11
```

Theme: Kate

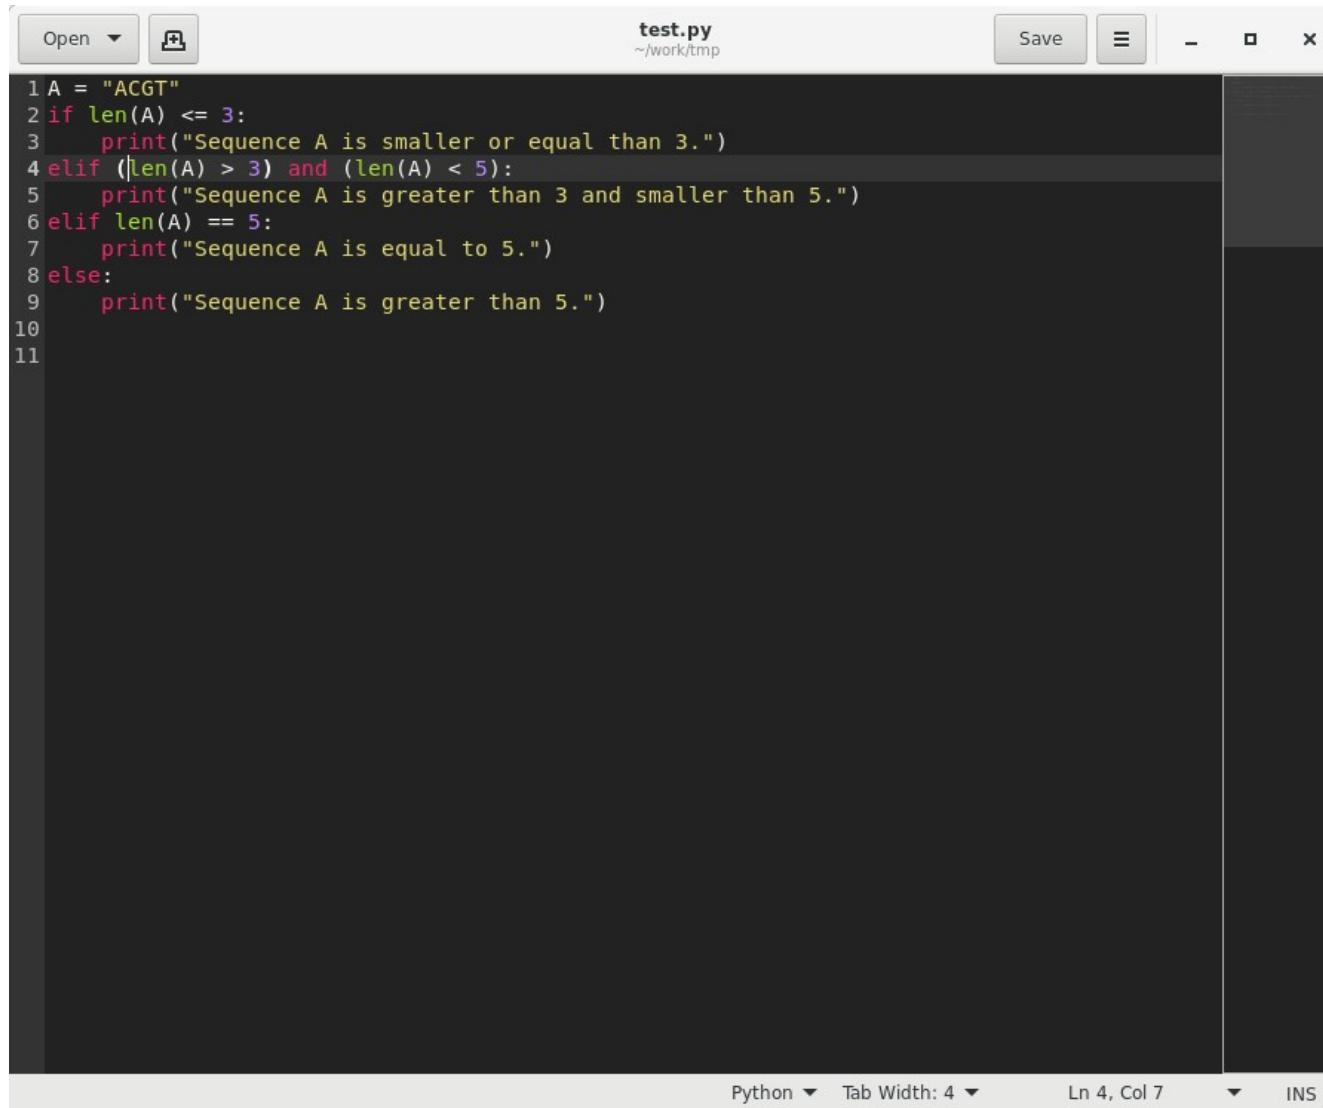

The screenshot shows the Gedit text editor interface with a dark 'Oblivion' theme. The window title is 'test.py' located at '~/work/tmp'. The file contains the following Python code:

```
1 A = "ACGT"
2 if len(A) <= 3:
3     print("Sequence A is smaller or equal than 3.")
4 elif (len(A) > 3) and (len(A) < 5):
5     print("Sequence A is greater than 3 and smaller than 5.")
6 elif len(A) == 5:
7     print("Sequence A is equal to 5.")
8 else:
9     print("Sequence A is greater than 5.")
10
11
```

The code uses color-coded syntax highlighting where blue represents keywords like 'if', 'elif', and 'else', and yellow represents strings and comments. The status bar at the bottom indicates the file type is 'Python', tab width is 4, the current line is 4 and column is 7, and the mode is 'INS' (Insert).

Theme: Oblivion

A screenshot of the Gedit text editor interface. The window title is "test.py" located at "~/work/tmp". The file contains the following Python code:

```
1 A = "ACGT"
2 if len(A) <= 3:
3     print("Sequence A is smaller or equal than 3.")
4 elif (len(A) > 3) and (len(A) < 5):
5     print("Sequence A is greater than 3 and smaller than 5.")
6 elif len(A) == 5:
7     print("Sequence A is equal to 5.")
8 else:
9     print("Sequence A is greater than 5.")
10
11
```

The code uses color-coded syntax highlighting: "A" is blue, "if", "elif", "else", "print", and "len" are red; strings are green; and comments are yellow. The editor has a dark theme. At the bottom, there are status indicators: "Python" dropdown, "Tab Width: 4" dropdown, "Ln 4, Col 7" status bar, and an "INS" indicator.
