
National Bioinformatics Infrastructure Sweden NBIS

Dag Ahrén

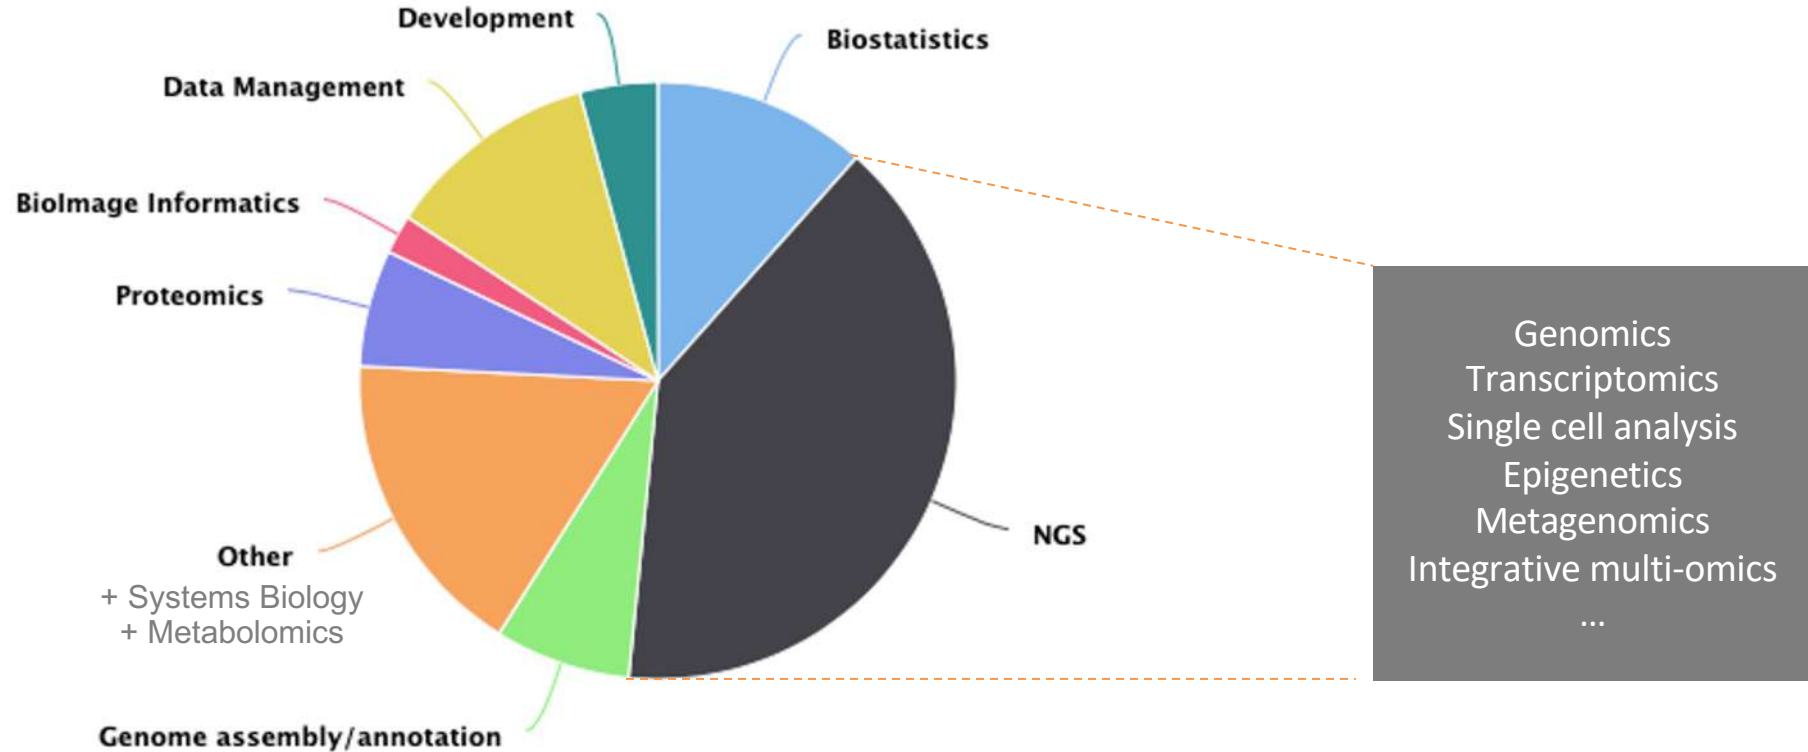

~100 staff at six different sites across Sweden with expertise in many different omics-related areas

NBIS - The SciLifeLab Bioinformatics Platform

nbis.se

Overview of NBIS units

<https://nbis.se/>

The screenshot shows the NBIS website homepage. At the top left is the NBIS logo. At the top right is a navigation menu with links for Support, Infrastructure, Training, News, Events, and About, followed by the SciLifeLab logo. The main header features the large NBIS logo with the text 'NATIONAL BIOINFORMATICS INFRASTRUCTURE SWEDEN' below it. A dark blue banner contains the text: 'NBIS is a distributed national bioinformatics infrastructure, supporting life sciences in Sweden'. Below this is a red banner with the text: 'See [here](#) for information on how our services are affected by the [covid19](#) outbreak'. The main content area has a light blue background and features three green boxes with icons and text: 'Support' (with a group of people icon), 'Infrastructure' (with a gear icon), and 'Training' (with a graduation cap icon). Each box contains a brief description of the service.

NBIS
NATIONAL BIOINFORMATICS
INFRASTRUCTURE SWEDEN

NBIS is a distributed national bioinformatics infrastructure, supporting life sciences in Sweden

See [here](#) for information on how our services are affected by the [covid19](#) outbreak

Support
Support services ranging from short consultation, consultancy to long-term embedded bioinformaticians.

Infrastructure
Providing infrastructure in the form of services, computational resources, tools and guidelines to the life science community.

Training
Training events in advanced and applied bioinformatics.

Support

Support services ranging from short consultations to long-term embedded bioinformaticians.

Infrastructure

Providing infrastructure in the form of services, computational resources, tools and guidelines to the life science community.

Training

Training events in advanced and applied bioinformatics.

Drop-in sessions

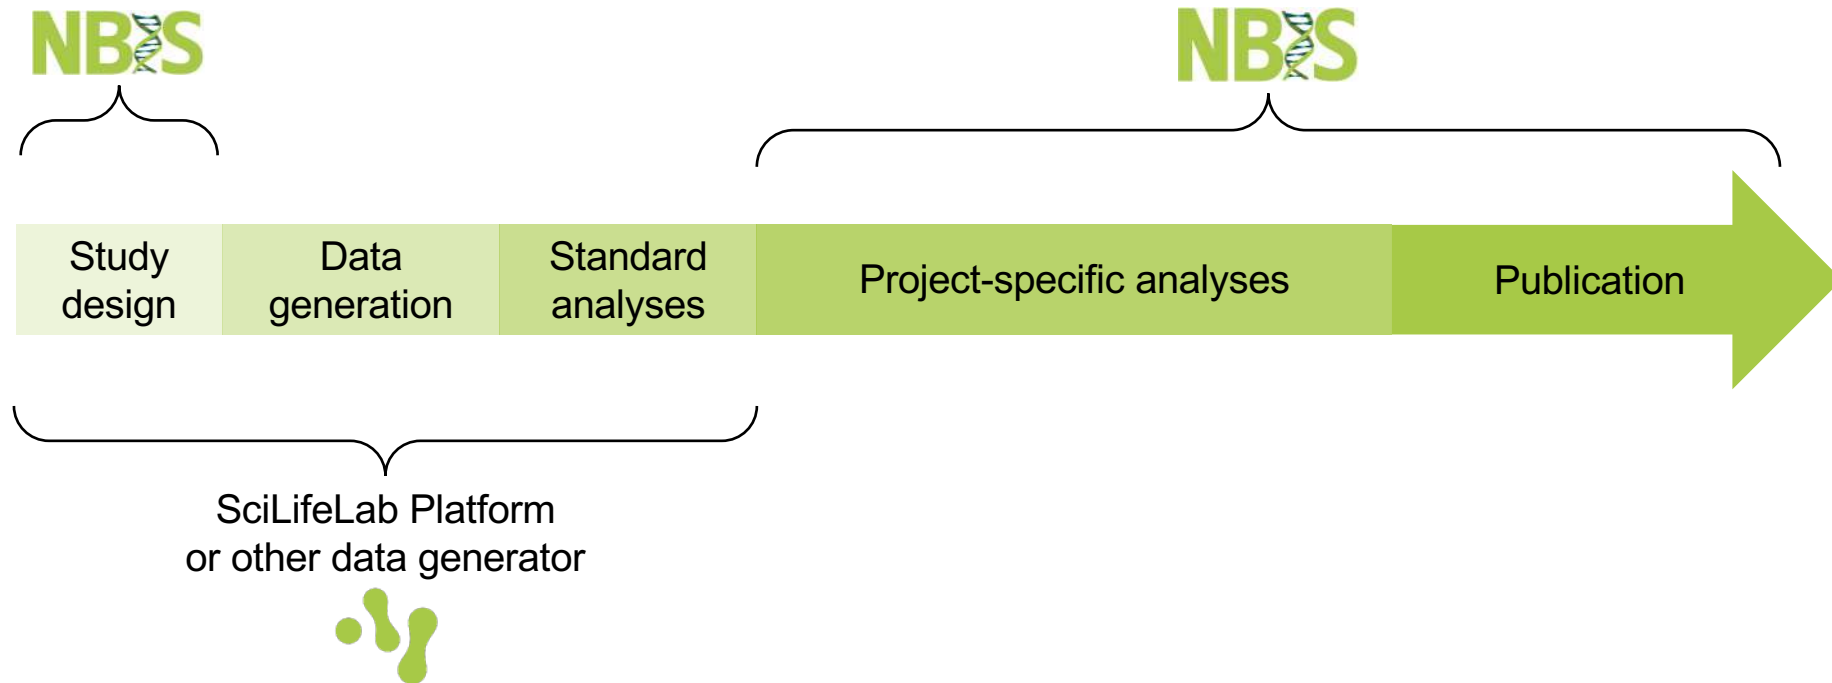

Ask your question!
Bioinformatics, sequencing, data
management, and more
Online - Tuesdays at 14.00

Study Design & project consultation	3 h per project No hands-on work
Short or medium term support (Fee-for-service)	User fee 800 SEK/h * All projects welcome, queuing system
Long-term support (KAW funded)	500 h support over ~ 1-2 years, for free Scientific selection by committee, 3 application rounds/year Involvement from research group mandatory
Partner Projects	For projects with large bioinformatic component "Hire" an NBIS bioinformatician Full-cost model: utilize and pay for e.g. 50% of one NBIS FTE

*The BioImage Informatics Facility has a slightly different financing policy

Support

Support services ranging from short consultations to long-term embedded bioinformaticians.

Infrastructure

Providing infrastructure in the form of services, computational resources, tools and guidelines to the life science community.

Training

Training events in advanced and applied bioinformatics.

Infrastructure development

- International repositories (e.g. Federated EGA)
- Hosting/interoperability of national resources of major interest (e.g. Human Protein Atlas, SweFreq, Metabolic Atlas)

Data management (close collaboration with Data Centre)

- Representing Sweden in international data initiatives
- Data Stewards to guide users in data management and FAIR data publishing

Tools

- Maintaining a few selected major Swedish software
- Continuous development of software, workflows and services

Mr Bayes
Bayesian Inference
of Phylogeny

ENCAM

- Data stewards support researchers
- Collaboration with SciLifeLab Data Centre (supports platforms)

About 6 staff members

A **bridge** between NBIS and SNIC-funded UPPMAX

- SNIC — **free to use** national infrastructure for computing, funded by Swedish Research Council
- UPPMAX — Uppsala high-performance computing centre

Provides a **digital research environment** serving 700+ PIs with over 1000 projects

Focus on HPC systems provided by UPPMAX

22 members + 1 observer

Five technical platforms for

Compute

Data

Tools

Interoperability and
Training

Complemented by **Communities** in

Marine metagenomics

Rare diseases

Human data

Plants sciences

Proteomics

Metabolomics

Galaxy and more to come

Swedish contributions:

- Human Protein Atlas
- Human Data Community
- Federated EGA and Beacons
- Data Management
- Biodiversity
- Training (Jessica Lindvall Ex-Co)

- Bengt Persson, Head of Node
- Jessica Lindvall, Deputy Head of Node and Training Coordinator
- Johan Viklund, Technical Coordinator
- Jessica Lindberg, Node Coordinator

At the global level interactions with:
RDA, NIH BD2K, GA4GH

Support

Support services ranging from short consultations to long-term embedded bioinformaticians.

Infrastructure

Providing infrastructure in the form of services, computational resources, tools and guidelines to the life science community.

Training

Training events in advanced and applied bioinformatics.

Training events and programs

- Courses, teacher-dense for good networking
- Mentor program, boosting PhD skills

Rapid knowledge-transfer

- Drop-in sessions (Currently online, Tuesdays at 14:00)
- Catalyse rapid knowledge-transfer across projects/research areas
- Portable tools and workflows to empower users

Training opportunities:

<https://uppsala.instructure.com/courses/48087/pages/nbis-training-catalogue>

Example workshop topics:

- Python
- Data visualisation in R
- Biostatistics
- Workflows (snakemake) Bring your own code
- Reproducible research
- RNASeq & scRNASeq
- Epigenomics

- Immersive training on Genomics, 2 weeks.
- <https://evomics.org/2022-workshop-on-genomics-cesky-krumlov/>
- Deadline April 6

Any questions?

The screenshot shows the NBS website homepage. At the top left is the NBS logo. The main header features the large NBS logo with a DNA double helix, followed by the text "NATIONAL BIOINFORMATICS INFRASTRUCTURE SWEDEN". A navigation menu at the top right includes "Support", "Infrastructure", "Training", "News", "Events", and "About", along with the SciLifeLab logo. A red banner in the center contains the text: "See [here](#) for information on how our services are affected by the covid19 outbreak". Below this, three green boxes describe the services: "Support" (consultation and embedded bioinformaticians), "Infrastructure" (computational resources and guidelines), and "Training" (advanced and applied bioinformatics events).
